## FABULOUS FEEDBACK

Used this resource with my targeted intervention groups to prepare for state testing! This was PERFECT. The passages were engaging and truly prepared them for what was to come on the actual BIG test. Thank you for taking the time to create amazing resources like this!

These are exactly what I was looking for when it comes to reviewing and assessing the standards! Our district is very data driven on priority standards and this resource gives me the opportunity to focus on the standards to make sure my students are in fact really learning and understanding what is being taught. 100% would recommend this!
