Vocabulary Book

To make it easier for you to copy, cut, and staple into books, I have included duplicates on the top and bottom of each page. This will also help you save paper if you'd like to run them front/back before cutting and stapling. There are also lines on the last page to add a few of your own words if you desire. My students figure out the meaning using context clues, but you could have your students use the dictionary as well.
